

# The PERFECT Classroom Instructions

## Step One: Planning Stage

Using the **Mind Map**, brainstorm EVERYTHING that you would think is necessary to have the MOST ultimate perfect classroom. Pretend you are a teacher and you could plan the class. Go crazy or keep it fairly simple.

- Think about the furniture and electronics that you could not live without.
- What colours would you use?
- Would you put up posters or pictures?
- What would you want for flooring?
- Would you have desks, tables?  
What types of chairs?
- Is it a large room? Is it on a totally separate floor?
- Will you have your own bathroom? Spa? Gym? Trampoline? Hot tub?

## Step Two: The Designing Stage

Using **My Classroom Plan**, begin sketching your ultimate classroom. Be sure to draw it from a bird's eye view (as if you removed the roof and were looking down). Try to include everything from your mind map. After, be sure to colour it!

Write a VERY descriptive paragraph describing your unique space.

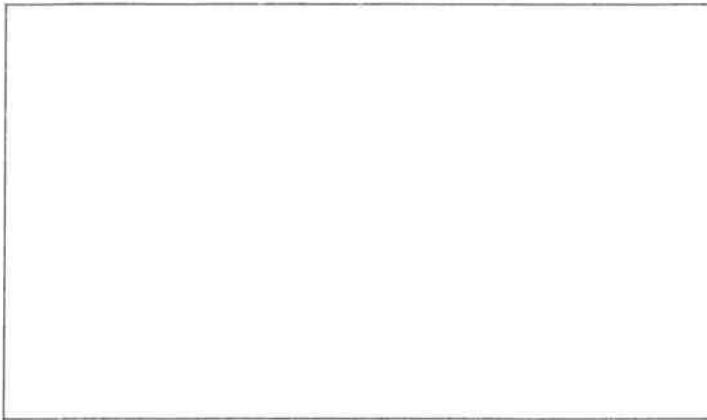

# Perfect Classroom Project

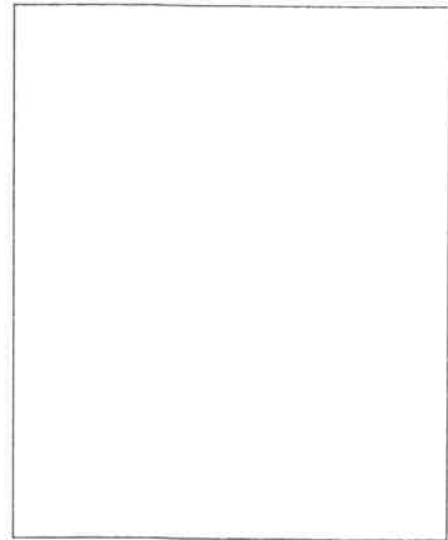

## Planning Mind Map

**Directions:** Here is your opportunity to create the ultimate, perfect classroom! In order to design it, you will need to think about what you would like to see in your class...

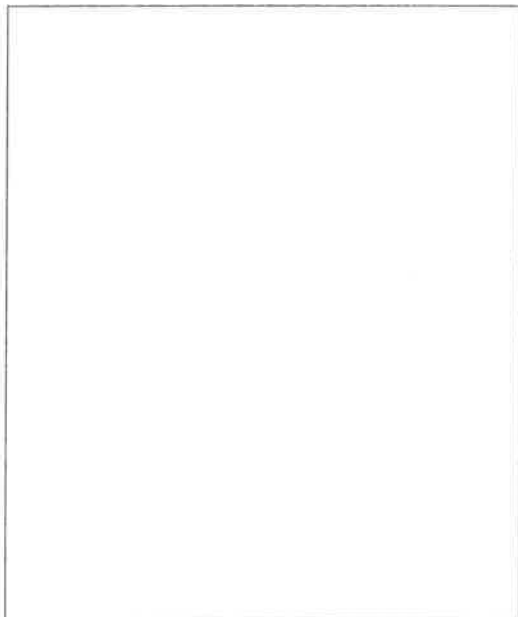

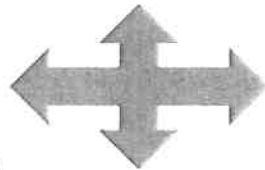

Furniture and Electronics?

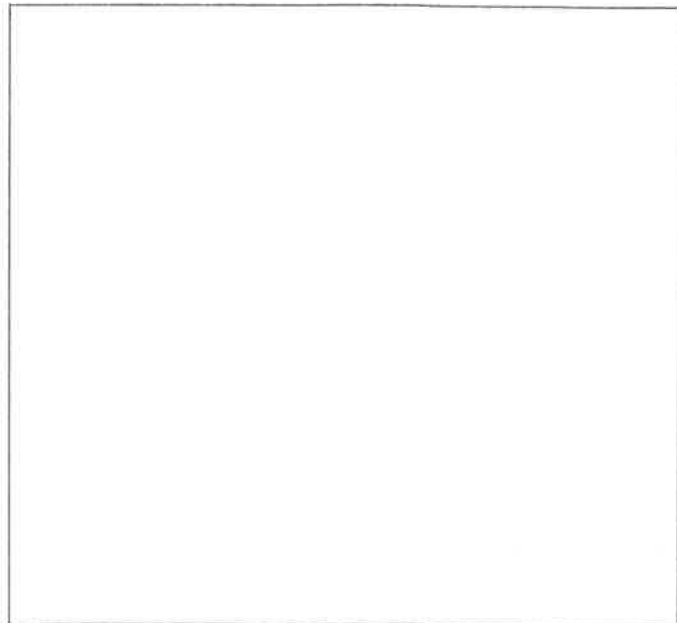

Decorations and wall art and flooring?

Size (dimensions in metres)  
and shape of room?

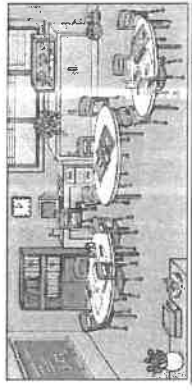

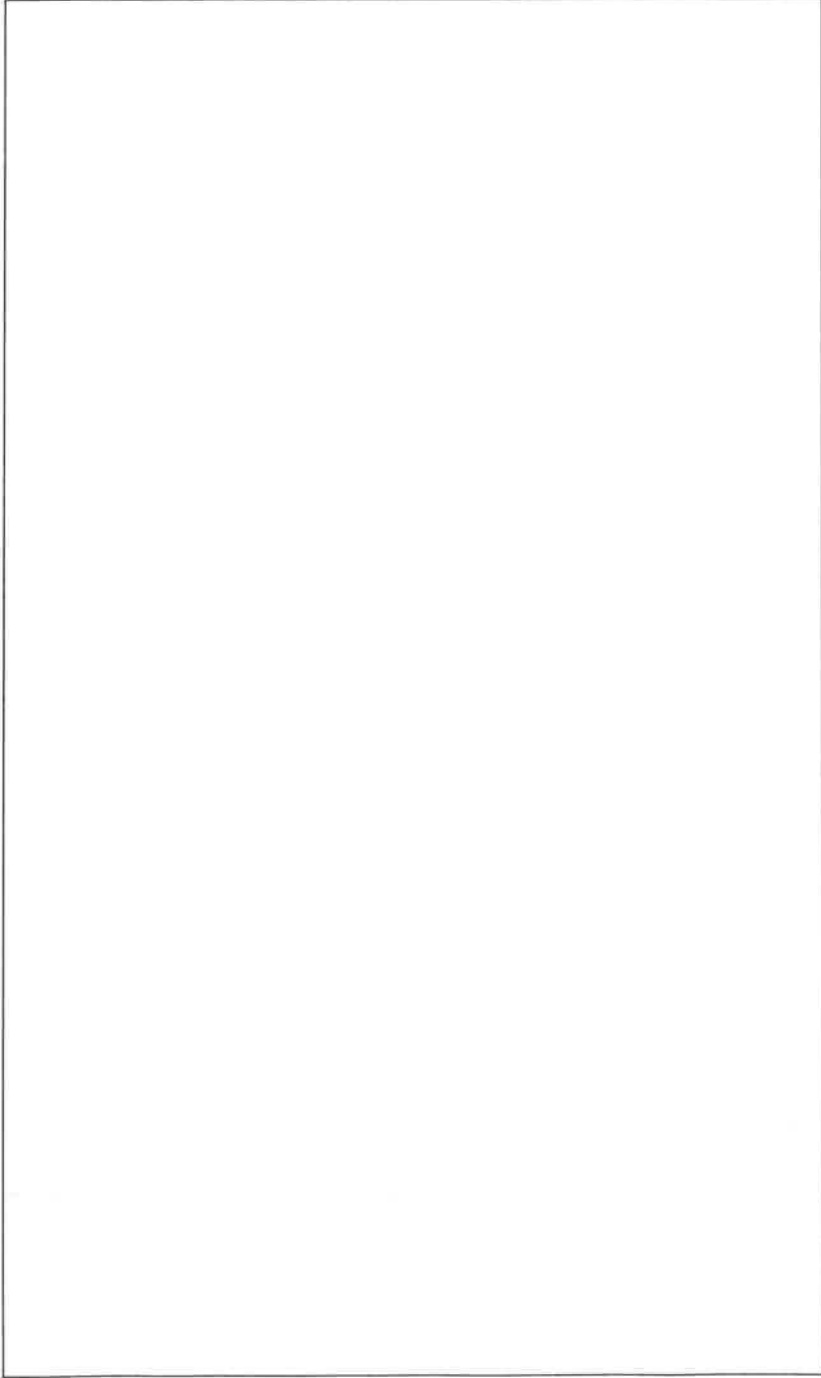

Other things (bathroom, hot tub, gym equipment)?
